

# Aleksandrs Kornijenko

CURRICULUM VITAE

## Profile

Experienced and hardworking logistics specialist, who has decided to take the challenge and start a career in the software testing field. Therefore, I've completed software testing courses and am ready to put new knowledge and skills into work!

Software testing for me is like solving a puzzle, trying to use all available methods, strategies, tools, and knowledge to find issues and fix them, providing the highest quality products to end customers.

My personal qualities, such as attention to detail, responsibility, reliability, together with many years of experience in creating and maintaining documentation, will lead to a successful start in the IT field.
